#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Response to Arguments***

1. In view of the Appeal Brief filed on 04/02/2007, PROSECUTION IS HEREBY REOPENED. The Office Action is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

2. Applicant's arguments, see Appeal Brief, filed 04/02/2007, with respect to the rejections of claims 1-5 and Declaration Under 37 CFR 1.131 filed on 6/29/2007 have been fully considered and are persuasive. Therefore, the rejection mailed on 8/25/2006 has been withdrawn

Art Unit: 2622

due to a newly found reference. However, upon further consideration, a new non-final office action is set forth below.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Oda (US 6,831,692).

Regarding claim 1, Oda discloses an image sensor comprising:

(a) an array of pixels (array of photosensitive cells 14 a, figure 9, column 11, lines 35-62) for collecting incident light and converting the light into an electrical charge;

(b) a color filter array (color filters, column 4, lines 35-45; column 6, lines 55-60) having a plurality of colored filters positioned adjacent to the pixels for selectively transmitting specific spectral bands of light to the pixels;

(c) a plurality of lenses (microlenses 16s, 16 b, figure 9, column 11, lines 35-62) positioned adjacent to individual pixels wherein the lenses positioned adjacent a first color of the colored filters are substantially larger in size than lenses adjacent a second color (the size of microlens 16b is larger than the size of microlens 16s, column 11, lines 35-50), such that a greater proportion of the incident light is focused onto the pixel adjacent of the first color of the

Art Unit: 2622

colored filter (column 2, lines 50-55), and wherein a center of each lens is at a uniform spacing (figure 9 shows that the center of each microlens 16b, 16s is at a uniform spacing).

Regarding claim 2, Oda discloses wherein the color filters include a blue colored filter which is the first color in the color filter array (column 6, lines 55-60).

Regarding claim 3, Oda discloses wherein the color filters include red and green colored filters either of which is the second color (column 6, lines 55-60).

Regarding claim 4, Oda discloses wherein the color filters include a red colored filter which is the second color (column 6, lines 55-60).

Regarding claim 5, Oda discloses wherein the color filters include a green colored filter which is the third color and which lens adjacent the green colored filter is substantially smaller in size than the red colored filter (figure 9, column 6, lines 55-60; column 11, lines 35-53).
